## Projects / Open-Source

FitFolio-Fitness Website | *React.js, React Bootstrap, CSS*

- A fitness website built using React provides users with an engaging and interactive platform to track their fitness goals, access workout plans, monitor progress, and gain insights into their health and wellness journey.
- Link- <https://deepakkardel.github.io/FitFolio/>

Banking System | *Python OOPS*

- A Python project is designed with an object-oriented approach, with classes for customers, accounts, transactions, and banking services.
- Features included creating and managing customers, accounts, and transactions, as well as performing banking services such as withdrawals, deposits, and transfers.
- It also allows customers to view their account information, including account balances, recent transactions, and other details.
